

Wash at or below 30°

The garment can be washed using washing machine at or below 30 degrees. Washing the garment at a major temperature can damage its peculiarities such as base fabric or prints.

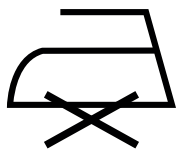

Do not bleach

Do not use bleach to wash the garment. Using bleach can affect the base fabric color, the reflective accessories and the prints, damaging them.

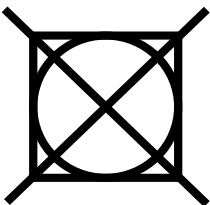

Do not dry clean

Avoid the dry clean, even at laundries or dry-cleaner. Dry clean can damage the garment, affecting the base fabric and the prints.

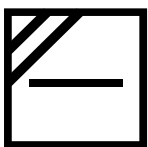

Do not steam

Do not steam the garment, not even from inside-out. Steam or high temperatures can affect the base fabric, the prints and even the measures of the garment, stretching the sewings and thus it might cause a size decreasing.

Do not tumble dry

Do not tumble dry the garment, even at laudries or dry-cleaner. Tumble drying can affect the base fabric, the prints and even the measures of the garment, stretching the sewings and thus it might cause a size decreasing.

Dry flat in shade

Dry the garment flat and do not expose it under the direct sun light. The UV can affect the base fabric color, causing color shades/fading, and the prints.

Hand wash

This garment is made with recycled fabrics and characterized by reflective details and accessories, beside the Graphene Plus G+ Planar Thermal Circuit® printed inside. To preserve its technical and style peculiarities, we strongly suggest to hand wash it.
